

Backup as a Service (BaaS)

Protect your critical data assets

Backing up and recovering data is a necessary discipline in all organisations. Most data loss instances are caused by operational failures such as power, hardware and software failures and human error, the consequences of data loss are well documented.

The importance of resilient technology is understated when it comes to your data, maintaining systems that cannot meet your policies, requirements and timeframes represents a significant risk to your business.

Ensure business as usual

Trustmarque provide a simple and reliable cloud integrated backup solution contributing to business continuity and disaster recovery, a solution that protects your data and your applications on your on-premises servers and virtual machines.

The service has been designed using enterprise class technology. Powered by Microsoft Azure Backup the security levels provided by a worldwide network of Microsoft managed data centres ensures your information is in safe hands. End-to-end service levels with SLA's for backup and the responsiveness of 24x7x365 support and monitoring from Trustmarque's service team combine to deliver peace of mind that your data is in safe hands.

Key benefits

Save money

By reducing the costs of procuring, operating and maintaining an internal backup service

Always-on coverage

24x7x365 access to our support team for added peace of mind

Security & Compliance

Enterprise grade delivered from a worldwide network of Microsoft-managed data centres

Peace of mind from service continuity

With the ability to undertake regular testing ensuring the service is operating effectively

Get ready to benefit from cloud

Our team of experienced Azure specialists provide support and services to simplify and accelerate your Azure purchase, adoption and usage.

By purchasing Azure resources through Trustmarque, you can enjoy a seamless ordering, provisioning and support experience from a team that knows you, understands Azure and has your cloud success as our top focus.

We offer competitive pricing, without forward commitment, a choice of SLAs, as well as Advisory Services to help review your plans, keep you updated on any Azure changes and support your Azure project delivery from start to finish.

Start small, grow fast, with support and control

Our Enterprise Services Portal also provides additional functionality beyond that which comes as standard with Microsoft Azure, to simplify financial management and billing of the dynamic, consumption based pay as you go (PAYG) costs, calculating and managing all your Azure activity to reduce risk, control costs and ensure you get the most out of Azure.

Why Trustmarque?

To deliver the most effective and relevant Backup service possible, we've combined our expertise in the latest cloud, infrastructure and application technology with our enterprise IT experience of more than 20 years. We know what it takes to protect your critical data assets, having been responsible for both public and private sector organisations' core infrastructure; and building a range of backup solutions across our own and other companies' datacentres. As a result, we understand more than the technology we use in our solution: we are familiar with delivering end to end Business Continuity Planning for our customers that spans their end users, partners and business processes. Our broad experience makes us comfortable delivering hybrid solutions. If you need to leverage existing investments, transition incrementally or keep more control over a part of your estate, we can deliver Hybrid Cloud Backup, helping you integrate the different components and processes involved. Whatever the challenge, we aim to deliver a one-stop shop for Backup.
