

# CLOUD APPLICATION READINESS ASSESSMENT

Moving to embrace a cloud is great in theory, but many organisations find it hard to move beyond desire and buzz words to realising value and safely adopting 'strategies that work for their organisation' methods.

There are a large number of clouds and more ways to use the technology each vendor brings. Many organisations find that trying to move to the most current development and support practices is hard without external help. Their current thinking, processes and systems are not setup to support the radical change needed to get real value from the latest methods and technologies.

One of the key components of any cloud adoption is to find the best applications to move, and the best patterns to follow when doing so. The Cloud Application Readiness Assessment is designed to do just that.

Over the last 3 years Trustmarque has helped many customers start their cloud journey. The Cloud Application Readiness Assessment combines best practices from these very different customer engagements to help you get started well, avoid common pitfalls and return real business value.

## Why use the Cloud Adoption Readiness Assessment?

The Cloud Adoption Readiness Assessment provides benefits to all areas of your IT organisation:

### IT MANAGER

- Shows the viability of migrating early candidate or critical systems and highlights possible dependencies
- Reduces operational risks and identifies costs

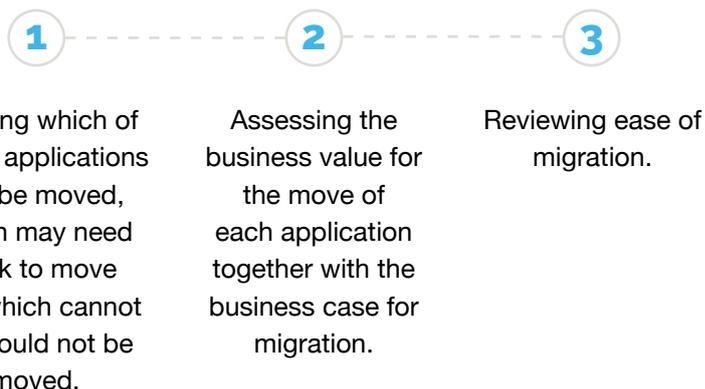

### IT LEADER

- Reduces the business risks of false starts and errors
- Checks that the benefits in the business case for migration are achievable for some critical applications
- Starts to identify the investment needed to make the programme a success

## What is Trustmarque's Cloud Application Readiness Assessment?

Working with your internal team, our architect will assess 10 applications. This assessment involves;

At the end of the assessment the output from this analysis will be delivered back to you and your teams in a report format.

## Why Trustmarque?

We have continually worked with Microsoft for 30 years in many products and services. We have an experienced and knowledgeable team with capabilities across many areas of applications, business insights, and IT systems management.

Our delivery practitioners are highly skilled and work to a common methodology designed to ensure that our customers get a high quality outcome. We have considerable in house experience of managing entire services and platforms, allowing us to see beyond the immediate demands of a project to underlying business needs.

Our aim is to simplifying IT for our customers so that they can take advantage of the latest technologies available and cost savings.

## Next steps

On completion of our Cloud Application Readiness Assessment we offer follow on services to help you continue on your cloud journey, including;

- **The Cloud Adoption Framework;** ensuring your migration project delivers real business value
- **The Azure Operations Framework;** helping you make fast and efficient use of Azures' capabilities with a radically reduced learning curve
- **The Cloud Application Migration Factory;** introducing tried and tested migration capability so you can avoid costly mistakes
