

SUBSCRIPTION HEALTH CHECK

As your cloud journey unfolds your organisation may make tactical decisions on cloud deployments, acquire cloud assets from partners, or take on management of cloud systems developed on your behalf. It's important for an IT manager to understand both the risks and opportunities that these resources represent, and our Subscription Health Check is designed to meet that need.

Our cloud specialists will work with your team to discuss, confirm, and document the cloud environment from a range of perspectives including; organisation, deployment, operations, access control, data management, and technology awareness. We'll also review complex areas like networking, virtual machines, scalability and performance management, to give you a holistic view of the assets provisioned, and provide you with an independent assessment of capability upon which to plan improvements.

With a fixed-cost per subscription review, a simple engagement model, and a clearly defined output, the Subscription Health Check is a simple way for you to establish a trusted baseline from which to plan an improvement programme.

Why arrange a Subscription Health Check?

Quickly get an independent health assessment of the resources provisioned in an Azure environment.

PREDICTABLE

- Fixed-cost, and fixed duration for maximum confidence
- Clear scope and outputs so you know what you're getting

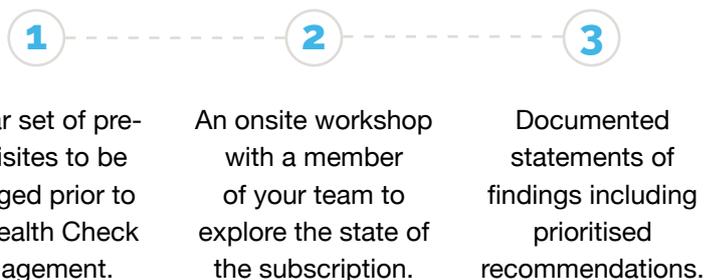

INDEPENDENT EXPERTISE

- Cut through mixed-messages to discover the risk exposure and potential opportunity of your Azure estate
- Reviewed by a specialist with experience of a wide variety of subscriptions across many industry sectors

What is Trustmarque's Subscription Health Check?

Working with your internal team, our architect will assess the current environment. This assessment involves;

Trustmarque continually review the Health Check criteria and scoring system to ensure it is up-to-date with the latest Microsoft and industry technology guidance.

Next steps

Recommendations made by the health check are always vendor agnostic. However, where we offer relevant services we will highlight these. For example:

- Developing your **Azure Operations Framework**, everything you need to define and manage an advanced Azure operational management capability
- Reduce costs, improve stability, or increase performance by refactoring applications to use cloud native technologies, using our **Innovation Labs**

Our **Azure Operations Framework** provides a series of detailed workshops in which we work with you and your team to cover all the areas needed to build and operate a software-defined datacentre in Azure that is ready for production workloads.

Innovation Labs provide a reliable innovation delivery model with predictable costs. This service supports your cloud journey by optimising and extending your application portfolio with cloud-native technologies.

Why Trustmarque?

Trustmarque has a breadth and depth of experience with public and private sector clients in delivering successfully bespoke applications and transformation programmes.

Working with Microsoft for 30 years across a wide range of products and services has helped us to build an experienced and knowledgeable team, with a unique blend of capabilities across all aspects of applications, business insights, and systems management.

We use our skills to simplify IT, enabling our customers to accelerate their organisational objectives with an expert technology partner.
