

Data Warehousing for the NHS

NHS data must be reliable, accurate and evidence backed, yet efficient and effective reporting can be a real challenge for the NHS. Typically dependent on processes and reporting tools that have grown organically over the years, many NHS Trusts struggle with protracted reporting processes that are complex, resource intensive and prone to error.

Stop the data struggle now.

How? With Bedrock, a comprehensive NHS focused Data Warehouse & Analytics platform

What is it?

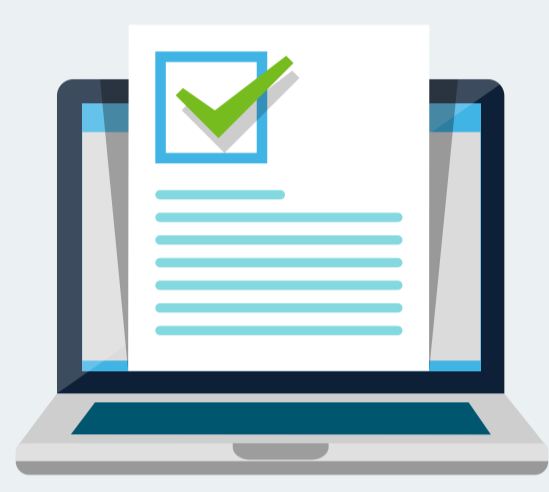

- A customisable, off-the-shelf tool
- It maintains an NHS Digital compliant data warehouse
- A cost effective solution
- Addresses issues of resources and complexity for the NHS

What can it do?

- Automate all regular reporting activities for a Trust
- Make processes and reporting faster and reliable
- Run large updates in minutes
- Ensure data is available 24/7

Faster, more reliable and accurate reporting

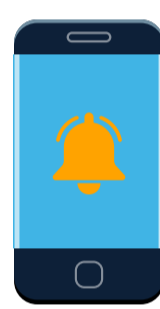

Regulatory and statutory reports

Commissioner data and returns and the board pack

KPIs and operational reports to desktop or mobile with multichannel alerts

Budget modelling and finance reporting on a daily basis

Bedrock Data Warehousing benefits all areas:

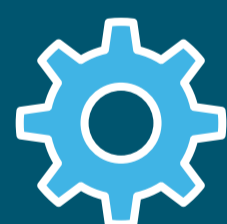

Finance

- Monitor tariffs daily against plan on any device
- Flexible forecasting to test rules and agreements
- Manage charge allocation in near real time
- Improve planning with early indicators and automated budgeting
- Detailed data for every level including patient, clinician and department

Informatics

- Reduce costs and risks in producing statutory and commissioner returns
- Automatic and immediate KPI reporting to mobile or desktop
- Manage data quality for accurate SUS
- Faster ad hoc analysis with always-on reporting 24x7
- Simplify and improve RTT production
- Better analytics and quality of reporting data
- Improve informatics efficiency by 75% to deliver more analysis and less housekeeping

Operations

- Access CDS and SUS files
- Aggregate Contract Monitoring (ACM)
- Produce interactive board packs as often as needed
- Access live bed state and A&E breaches data
- Streamline waiting list optimisation
- Fast and low resource RTT pathways management
- Improved and automated data quality

We've helped NHS Trusts save costs and resource by:

Automating processes

Reducing checking and applying updates time by 70%

Significantly reducing headcount by managing processes better
