

Remote Working on the frontline

Primary care services in England faced immense pressure when Covid-19 hit, with:

The Risk

With a lack of provision, certain services were at risk of falling down

A rapid response to an imminent threat:

Healthcare Partners

Microsoft

Virtual Desktops for Health is a collaboration between colleagues in Trustmarque, Microsoft and Healthcare Partners to deliver safe and secure remote access to healthcare professionals.

GPs

Out of Hours Staff

Social Care workers

Urgent Care

Administrators

Clinicians

Virtual Desktops for Health at a Glance

Anytime, Anywhere Access

Safe and Secure

Personal Device Compatible

Easy Set up

How It Works

1

Download

Download the virtual desktops application to your smart device

2

Launch

Launch the desktop application and login via two-factor authentication

3

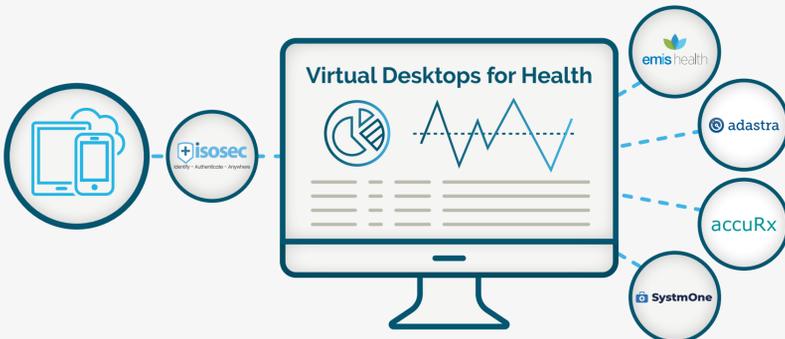

Access

Access your virtual desktops – the desktop will appear just as it does when in the “office”

Run a Remote Clinic

Schedule, deliver and manage patient appointments safely from home to meet the constant demand for GP and clinic services. Everything you need at your fingertips to deliver the best patient care.

Empowering health workers in the fight against Coronavirus

Reduce the strain caused by employee sickness, self-isolation and local staff shortages

Maintain patient services via access to full medical records and e-prescriptions

A safe option for all employees, especially those in the vulnerable category

No need for training or new devices – just download an app to any smart device

Easy to onboard new and recently returning staff quickly, and remotely

Simple set-up with no lag time or delays accessing applications through the virtual desktop

Together, we can empower healthcare professionals to continue vital work at this critical time.

We're in IT Together
