

FIRE UP YOUR FLEXIBLE WORKING WITH MICROSOFT SURFACE AS A SERVICE BY TRUSTMARQUE

Work without boundaries and achieve powerful performance, anywhere, anytime.

As work shifts between home, office and on the go, give employees the power to perform without boundaries.

In the transition to sustainable remote-friendly and agile ways of working, move from a focus on business continuity and 'keeping the lights on' to optimising the end-user experience and drive collaboration, productivity and employee satisfaction.

What is Surface as a Service?

Surface as a Service is an accessible, risk averse way of getting the latest Microsoft Surface technology in the hands of your employees, wherever they are.

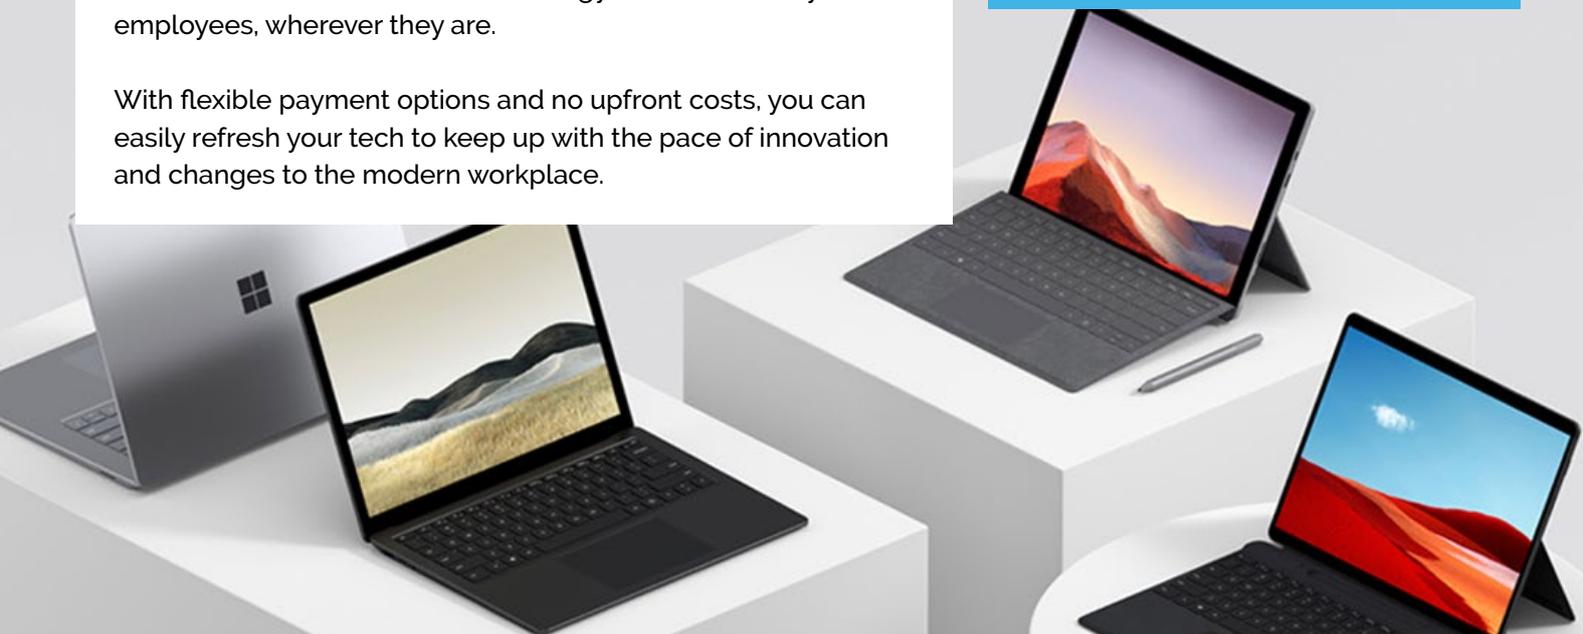

With flexible payment options and no upfront costs, you can easily refresh your tech to keep up with the pace of innovation and changes to the modern workplace.

88%

of users agree that Microsoft 365-powered Surface devices allow organisations to better support remote workers.

Forrester Total Economic Impact™ Study Commissioned by Microsoft titled, "Maximizing Your ROI From Microsoft 365 Enterprise With Microsoft Surface", July 2020

How Surface as a Service supports remote working

Employees want the power to work anywhere, with the same rewarding experience no matter where they are based Surface as a Service provides:

- High performing technology proven to increase collaboration that can be rapidly deployed to end-users
- Undisrupted productivity with constant access to company data and resources
- More automation and standardisation with greater control of security and governance for remote workers
- Light to zero touch deployment means devices are configured and positioned with minimal interaction
- A 24/7 solution to keep up with the pace of innovation and change, sharpening your competitive edge.

Deliver powerful performance at work, at home or on the go with Microsoft Surface

Surface has an option for everybody, including: Surface Go 2, Surface Pro 7, Surface Pro X, Surface Laptop 3 and Surface Book 2, with more to come.

Achieve seamless collaboration

Microsoft 365-powered Surface devices help employees become more collaborative through:

Seamless real-time knowledge sharing, communication and document collaboration

More interactive and engaging meetings with increased participation

Standardisation ensures the same experience for everyone and employees are free of limitations
