

GET YOUR PROJECTS BACK ON TRACK WITH FAST FINISH

Express Testing and Assurance Services

Imminent project deadline?

Hurting towards a deadline and worried that your project may fall at the last hurdle? Our Fast Finish service helps steer projects back on track and back on budget. Together, we'll streamline your plan with laser focus to ensure you meet the tightest delivery timeframes.

A complete testing solution

- FailFast identifies the biggest risks and brings laser focus to the project
- Regain visibility and control with a clear path to go live
- Speed up testing by as much as 96% to reduce error, time and project costs
- Go live with confidence to meet your business case

Why consider Fast Finish express testing and assurance?

Every day projects overrun, often due to factors outside of your control, such as supplier issues or unplanned disturbances. In addition, overly optimistic delivery teams can sometimes over-estimate project progress and under-estimate delivery timescales, leading to a race towards the finish. Whatever the reason, when a delay occurs your project costs increase and the go live is usually delayed.

Acutest has experience of bringing 100s of projects back on track. No matter how late in the day, our expert testing specialists can step in to help get your project over the line. We'll work closely with your third-party suppliers to improve accountability and performance and we'll support your delivery teams to bring in the timeline by providing absolute focus on the things that will ensure a speedy path to go live.

The core benefits

- Gain complete visibility and control of the path to 'go live'
- Manage your reputation and track record for delivering projects when you said you would
- Increase the speed of testing (as much as 96% faster) through story-based testing, qualified use of test automation and collaboration between all parties
- Reduce the cost of testing by as much as 55% by only testing what needs to be tested (typically this reduces test activity by 40% and identifies defects sooner)
- Dedicated team of testing specialists with 1000s of projects behind them who can work to the tightest deadlines

5 steps to an express go live with Fast Finish

1. Focus on what matters the most

A precise risk determination analysis is carried out to scope only what **MUST** be tested to go live. Risk is a combination of how likely it is to fail and the potential impact of that failure, should it occur.

2. Understand what more is required

We identify what else needs to be tested, such as any non-functional requirements. We ensure these are clearly defined and easy to understand by creating user stories and scenarios that offer real-world examples to help define the scope of testing and remove any ambiguity.

3. Know where you are and track progress

By reporting testing status against the risk determination analysis and against user stories, we provide a single view from a single 'source of truth' test repository. Access real-time, status updates to improve clear and unambiguous understanding.

4. Clear governance

Together, we shape and agree a clear path to 'go live' including: tasks, durations, dependencies, milestones and assigned resources. We implement a testing 'change control' process to avoid un-approved delays and provide a 'single source of truth' for tests, test results and defects, supported by a single defect management process. Testing exit criteria is then determined to provide an explicit view of 'readiness for go live'

5. Smarter testing

Achieve most value by testing in highest priority sequence. We help you adopt an incremental approach to enable testing as soon as possible to identify defects early and bring in automated testing where relevant. Finally, we ensure the right test environments across applications, integration and data are in place and leverage customer SMEs in collaborative testing.

Why Acutest and Trustmarque

Acutest is a market-leading testing and quality assurance provider with a rich history of helping 100s of customers with their digital transformation and change projects. Having joined Trustmarque in 2021, the Acutest testing expertise paired with Trustmarque's 30+ years IT transformation consultancy, provides an unrivalled option for those wanting to increase the pace, precision and impact of digital transformation.
