

TRUSTMARQUE
Trusted. Technology. Together.

Meet the new Trustmarque

An overview of who we are and what we do

Technology changes everything

Technology has improved our personal and professional lives at lightning speed.

This matters, because technology helps you to achieve more, evolve faster, and attract and retain the best talent. Technology empowers your people to acquire new skills, unlock automation, and liberates them to be their best. Technology means your customers and communities always get the service that exceeds their expectations.

Delivering the value of technology

We help you to acquire and adopt the right technology to deliver real-life impact. Together, we turn your vision into reality.

Our approach:

Our culture is based on innovation and collaboration; with colleagues, partners, and customers like you.

Trustmarque is a part of your extended team. We just get you. We live and breathe the reality of your day-to-day with shared ambitions and shared success.

Our vendor-agnostic approach means we analyse multiple options until we find the right solution for you. We make sure you get value for money, identify savings, and get the most out of the available technology.

Cloud and datacentres

Moving to the cloud and optimising your workloads has never been easier.

Whether you're looking to move to the cloud, future-proof your datacentre or secure your network, we offer solutions to solve your challenges. We will simplify your complex hybrid cloud deployment by providing valuable expertise and guidance wherever your workloads resides - from core to edge to cloud.

Cloud and datacentre solutions

Our highly accredited datacentre and cloud teams are masters at successfully designing, deploying and managing cloud solutions in the public sector and corporate space.

Cyber security

Resilient cyber security for uncertain times.

Our full defence cyber solutions pose a real threat to hackers. It's how we protect your people, processes and data. In a connected world, technology is evolving faster than ever, but external influences and sophisticated cybercriminal tactics are also accelerating the need for change. So, what can you do?

For 20 years we have nurtured an in-house team of cyber security experts to help you stay protected. Our portfolio of cyber solutions and world-class partners means we deliver game-changing professional services, technology and 24x7 UK based managed services to meet every one of your cyber security needs.

Accredited by:

Our cyber credentials

We are proud to hold Check and Crest accreditations, as well as being a Microsoft solutions partner for security. With over 20 years' experience, we have built an award-winning security team.

We simplify the complexity of cyber security and deliver real life impact through the following offerings:

- Managed Detection and Response
- Microsoft Security Workshops
- Secure Access Service Edge
- SASE Workshops
- Maturity Assessments
- Penetration Testing and Consultancy
- Cloud Security
- Insider Threat Protection

Workplace and automation

Move your workplace beyond the office limits.

We know remote and hybrid working pose new challenges, and possibilities. With the latest digital workplace solutions there are opportunities to create more engaged, flexible, and productive teams.

Underpinned by our long-lasting Microsoft partnership, our Technology Asset Management services will help you get the most out of your software strategy and find cost-savings to be reinvested.

Free your employees from mundane tasks with our highly customisable automation services. Work smarter, improve operational performance and enhance the customer experience by introducing RPA to take care of high-volume, repetitive tasks.

Digital workplace offerings

- BizApps
- FastTrack Ready for Microsoft 365
- Microsoft Viva
- Azure Virtual Desktops
- Windows 365
- Windows 11
- Remote Working Solutions

Intelligent automation

- Robotic process automation

Software services

- ITAM

- Microsoft Licensing

Data and analytics

Real-time data you can plan on, act on, count on.

Data is one of the most valuable assets you have, second only to your people. Our innovative solutions solve complex problems and have an emphasis on knowledge transfer and building a legacy for healthcare providers and businesses alike.

With Bedrock Data Warehousing for the NHS you can make quicker, more informed decisions thanks to real-time data access, insight and visibility.

Our Power BI Enablement service puts deep insights into the hands of the staff whose everyday decisions contribute to patient health and successful ward management.
